Hi Eric,

I have no problem with this. Or, if you'd like for me to ask, I could do that as well.

-Patrick

Hi Patrick:

I have a question for Rick from AccuView. A general question about radon lab reports. Do you have any issues of me contacting directly since it is your sub? I will copy you as well.

Thanks

**Subject:** NFB/HTC "As Is" Analytical Results

Good Morning Patrick:

All is well with me. How are you?

Lyndsey would like a table with Sample #1 having a column for Onsite-HPGe results, "As-is" results, and then the final 21 day ingrowth results. We will need a side by side comparison. Ultimately this will be given to the disposal facility (in the future to ensure our onsite lab is comparable to the fixed lab).

I believe Chad was already compiling these tables like this. Please check with him and then let us know if you have any questions.

Thanks

**Subject:** HTC "As Is" Analytical Results

Good morning Eric, hope all is well.

I wanted to let you know that we have started receiving "As Is" analytical results from Eberline for HTC. I am posting them to OneDrive as they come through in the "May 2017 Analytical Results" folder. I had sent you a brief table for NFB previously showing a few comparisons to the HPGe analysis. I have a few questions:

Would you like to see a comparison table for the HPGe results vs all of the "As Is" results from Eberline for both NFB and HTC? This

would take some time for sure. I just wanted to touch base on what level of deliverable/effort you'd like to have on these "as is" preliminary results and catch up with you, as I have been spending a lot of time in the field the last few weeks and am now back in the office for a while.

Thanks Eric!
